COURSE GUIDE**

| MELBOURNE | GEELONG | WARRNAMBOOL | OFF CAMPUS

2011

**POSTGRADUATE
COURSE GUIDE**

Welcome to Deakin University

Deakin University seeks to be recognised as Australia's most progressive university. We aim to do this by ensuring that all our activities are relevant, innovative and responsive.

From our four Campuses in Melbourne, Geelong and Warrnambool, Deakin successfully combines traditional values of excellence in teaching and research with an attitude that challenges conventional practices and produces new ways of developing and delivering courses. Postgraduate courses are offered from graduate certificate to doctoral level, in traditional disciplines such as arts and science, in newer fields such as sport, environment and nutrition, and in professional fields such

as accounting, architecture, commerce, engineering, law, nursing, psychology and teaching.

Deakin's distinctive medical program will contribute to the health and wellbeing of Australians by producing doctors who are fully qualified, broadly skilled and ready to pursue careers as generalists or specialists.

Deakin encourages a vibrant culture of research, working in partnership with government, industry and some of the world's leading research institutions to produce research of relevance both in Australia and internationally. Our goal is to improve Deakin's research

performance so that it is in the top third of the Australian higher education sector by building a critical mass of researchers who will develop a distinctive portfolio of high quality discovery, applied and commercial research.

We understand that many of our postgraduate students are juggling work, family and study commitments. We hope to help by being as flexible as possible without compromising quality. For example, we have introduced a trimester system which gives students more options when it comes to organising their studies.

Deakin welcomes students from all backgrounds and celebrates the richness that diversity brings to university life. The University offers a range of scholarships for commencing students including academic scholarships for high-achieving students and access and equity scholarships for students who may not otherwise be able to access higher education. Deakin also provides a range of support programs to ensure that all students have the opportunity to succeed in their studies.

The professional orientation of our programs, our numerous and varied partnerships, our rapidly increasing research profile and our innovative use of technology for teaching, make the University a leader in the provision of contemporary education.

I look forward to welcoming you to Deakin University.

Professor Sally Walker
Vice-Chancellor

Using this Guide

This Guide provides you with an introduction to Deakin University – the range of courses it offers, the support services available and an insight into life as a Deakin student.

It is designed to be read in conjunction with our postgraduate study area booklets, which contain detailed course information, including descriptions of course units.

You can apply online for a Deakin course, track the progress of your application and accept your offer at www.deakin.edu.au/apply.

Finding more information

Postgraduate Course Guide

This book provides a list of the postgraduate courses Deakin offers, detailed information about types of postgraduate study, how to apply, our campuses, and study options, such as part time and off campus (distance education).

Postgraduate study area booklets

Deakin has a range of postgraduate study area booklets. These brochures provide more information about each course, including course structures, career opportunities and unit descriptions. To order a copy, complete the form on the back of this book or phone 1300 DEGREE (1300 334 733).

Visit our web site

Visit our web site for more comprehensive course and fee information including details of new courses, Campuses, facilities and support services:
www.deakin.edu.au.

To search for courses and click through to unit descriptions visit www.deakin.edu.au/courses.

The benefits of postgraduate study

No matter what stage you are at in your current career, there are many reasons to consider further studies.

Having a postgraduate qualification will not only increase your knowledge in a specialised field of study but it will also help you to stand out in the marketplace – expanding your career opportunities and job prospects. With additional education often comes higher salaries. On average, people with postgraduate qualifications earn as much as \$18 000 more per year when compared to those with only a bachelors degree, (*Postgraduate Destinations 2007*, produced by Graduate Careers Australia).

But for many it's not just about higher incomes or status. If you have found a new passion or desire a change in your career direction, a postgraduate course can help you obtain the necessary qualification to pursue your goal. For example, you may need to undertake further study in order to gain professional accreditation in your chosen field. A postgraduate degree is often the fastest way to gain such a qualification.

You may wish to undertake postgraduate study because you have a personal interest in a subject or discipline area. Postgraduate study also allows you to extend your undergraduate studies, in particular, through research degrees (referred to at Deakin as higher degrees by research), where you can pursue your own theories or ideas at a high conceptual level.

Deakin University provides research and coursework degrees to match a variety of career plans and personal circumstances. Part-time or full-time study is available on campus and some programs may also be available off campus.

Postgraduate studies at Deakin enable you to expand your professional and social networks. You will study with like-minded people who share similar interests. Once you graduate, you can continue to maintain contact with other graduates and staff through Deakin's Alumni community.

Whatever your reason for considering further studies, Deakin offers flexible postgraduate study programs to easily fit around your work and lifestyle demands.

The difference is Deakin

Deakin offers a total university experience. You will receive a quality education that offers flexibility and prepares you for success in your career.

Study how and when you want. At Deakin it's your choice. Multiple course entry and exit points, deferment, residential programs, and full-time and part-time study options all allow you to structure your study to suit your life, work and personal commitments. The majority of our courses offer you the choice of on or off-campus study through the use of online technology, including podcasts and MP3s.

With three intakes a year, Deakin's **trimester system** gives you the potential to fast-track your degree, allowing you to progress your career by graduating sooner. The trimester system may also mean you can commence your postgraduate qualification at a time that is more convenient to you.

Deakin **prepares you for the real world** by providing opportunities to gain valuable, hands-on experience. Workplace skills are taught by industry professionals and practical experience is gained through placements, internships and overseas study programs.

Our courses are **relevant and responsive** to community and industry needs, as each course is designed and regularly reviewed by its own Course Advisory Board. Course Advisory Board members include academic and industry experts and professionals who provide advice on all aspects of a course (including the skills sought by industry employers), share industry knowledge, and provide input into course development processes, industry links and placements.

Deakin University's award-winning **residential programs** give busy professionals the opportunity to complete a unit in five consecutive days of intensive study. Participants immerse themselves in the unit content, undertake innovative and experiential learning activities, and build their professional networks. The programs are conducted at the Deakin Management Centre – a purpose built, world class, residential executive leadership centre at the Geelong Campus at Waurn Ponds.

With **more than 150 postgraduate courses** to choose from, Deakin offers you a broad range of options. In addition to providing high quality traditional programs, Deakin continually adapts and develops new courses to meet the ongoing demands of the domestic and international labour markets.

Choice of study environments. With Campuses located in Melbourne at Burwood, Geelong, and Warrnambool on Victoria's south-west coast, Deakin allows you to choose between metropolitan, regional or rural study environments. You can also choose to study from your home or office by studying off campus.

Deakin understands that **self-paced online learning** will play a major role in your ongoing career development and we are proud of the delivery of our innovative, flexible online study options for postgraduate students. These include:

- » iLecture – an automated media capture system that can provide online access to video, audio and lecture recordings via streamed Quicktime files, podcasts and MP3 downloads.
- » blackboard – the core learning management system used to deliver web-based course material and assessment tasks; it also facilitates communication and collaboration between students and staff.
- » eLive – a communication tool that allows participants to talk online in real time and share video presentations.

In some courses, Deakin offers you the opportunity to **study overseas** as part of your degree, bringing a different perspective to your studies and helping you to consolidate your learning.

Deakin's recent achievements have been recognised through many awards, including two Awards for Teaching Excellence and six Citations for Outstanding Contributions to Student Learning in the 2009 Australian Learning and Teaching Council Awards and a 5 star MBA rating by the Graduate Management Association of Australia (GMAA).

Deakin also achieved excellent results in the Australian Research Council 2010 awards and won the 2009 Governor of Victoria Export Award for Education and Training, in recognition of the University's innovation in and commitment to advancing education, training and research in international markets.

Students tell us that Deakin's **supportive staff and friendly environment** make it a great place to meet different people with new ideas. Our welcoming atmosphere also ensures that we continue to treat our students as individuals with freedom of thought and action.

Pathways to postgraduate study

At Deakin there are many pathways to postgraduate studies and in some instances you can use your relevant work experience as basis for admission into programs at a graduate certificate level. Once you have completed a graduate certificate, you can then articulate into a graduate diploma or masters degree course. If you have already completed an undergraduate degree you will usually be able to choose whether to embark on a masters degree, graduate diploma or graduate certificate. If you choose to undertake a graduate certificate or graduate diploma and then wish to progress to a masters degree, you will usually receive credit for prior learning.

If you are interested in a research degree you will usually need to have completed an undergraduate degree with an honours year or a masters degree with a substantial research component. Other qualifications may be accepted if the Higher Degrees by Research Committee considers them equivalent and you can demonstrate evidence of your research ability.

Types of postgraduate study

Whether you are a recent graduate wanting to differentiate yourself in the marketplace or an experienced professional seeking a career change or advancement, there is a Deakin postgraduate course to suit your needs.

Coursework or research?

You may undertake postgraduate study by coursework or research. The best option for you will depend on your reasons for studying.

A postgraduate degree by coursework typically involves a series of units, with specific coursework and assessments. A research degree involves completing an approved program of research under the guidance of one or more supervisors within a prescribed time period.

If you are interested in undertaking postgraduate study as a way of changing career, advancing your existing career, or meeting the professional requirements to pursue your chosen career, a coursework program may be the right choice for you.

Research degree programs encourage you to develop independent research skills and are for students who want to pursue their own theories and ideas at a high conceptual level. The skills developed as part of a research degree include the ability to formulate a significant research problem, relate the research to the broader framework of knowledge in the chosen area, and the mastery of appropriate skills to tackle the problem. Research results are usually incorporated into a thesis, which is submitted for examination.

Undertaking a research degree requires a much greater commitment of time than a coursework degree: at least 36 hours per week for 48 weeks of the year, for a full-time student.

Traditionally, research-level study has been viewed as a pathway to a research or academic career. However, employers now recognise that the varied skills gained through a research degree program are also highly applicable in the workplace.

For more information on the type of postgraduate study that best suits you and your career aspirations, please visit www.deakin.edu.au/postgrad.

Types of postgraduate degrees by coursework

Graduate certificate

These courses are designed to enable you to develop skills in a specialised area that may or may not directly relate to your undergraduate degree. Some graduate certificates are designed for those who have not completed an undergraduate degree and, once completed, the award can be used as a pathway to further postgraduate studies.

A graduate certificate can usually be completed in six months of full-time study or the part-time equivalent.

Graduate diploma

Graduate diplomas are more specialised and are usually vocationally focused. Entry is usually based on completing a bachelors degree or equivalent; however, alternative entry may be possible, based on professional or industry experience or other relevant approved qualifications. A graduate diploma can usually be completed in one year of full-time study or the part-time equivalent.

Masters by coursework

These courses are usually designed with the busy professional in mind. They are intensive courses in which the qualification is directly relevant to a career area, and they have the added benefit of providing an environment for networking with like-minded people.

A masters by coursework course can often be completed in 12 to 18 months of full-time study or the part-time equivalent.

Doctor of Business Administration (DBA)

The DBA qualification represents the highest level of educational achievement for business professionals who want to develop research capability which may be directly applied to business practice. The program provides you with an opportunity to extend your business knowledge and your ability to communicate professionally as well as to undertake independent research in an area of specialist interest. The program consists of coursework (12 credit points) plus a major research project (12 credit points), completed over three years of full-time study (or the part-time equivalent).

Contact hours

The contact hours for a coursework degree can vary depending on the type of course and your mode of study. For example, off-campus students are advised to spend approximately 10 hours of study per week per unit. If you are enrolled as an on-campus student, most units require three contact hours per week, plus up to seven hours per week of individual study time.

For more details please visit www.deakin.edu.au/courses.

Types of research degrees

Deakin provides research degree programs to match a variety of career plans and personal circumstances. Part-time or full-time study is available on campus and some programs may also be available off campus.

Deakin offers three types of research degrees:

- » Masters by Research
- » Doctor of Philosophy (PhD)
- » Doctor of Psychology.

A masters by research degree is awarded for an original contribution to knowledge achieved in up to two years of full-time candidature (or two to four years of part-time candidature). Usually a thesis of not more than 50 000 words is submitted.

Doctoral degrees are awarded for a substantial original contribution to knowledge achieved in two to four years of full-time (or four to eight years part-time) candidature. Usually a thesis of not more than 100 000 words is submitted.

In the case of both masters by research and PhD degrees, the program may include some coursework but the focus of the degree is on research.

A Doctor of Psychology combines a research project, coursework and structured research tasks that are specifically related to professional practice and are often carried out in the workplace. Deakin offers Doctor of Psychology degrees in the areas of clinical, health and forensic psychology. At least two-thirds of these programs are based on research.

Research Services Division

Research Services Division provides a central administration service for all students undertaking a research degree at Deakin University. It is one of the main points of contact for you and your supervisor on all matters relating to higher degrees by research. These include applications, scholarships, enrolments, changes of candidature, supervision matters, ethics in relation to research, biosafety in relation to research, as well as the examination process.

For more information please contact:

Research Services Division

Phone: +61 3 9251 7124
research-hdr@deakin.edu.au
www.deakin.edu.au/research

Support from the Faculty

Research degree students are also supported within their Faculty and School. Each Faculty determines its own management structure for higher degrees by research, and you are encouraged to consult the relevant Faculty about the staff responsibilities and contacts in this area.

For contact details, see the research page of your Faculty of interest, pages 24 to 30, or visit www.deakin.edu.au/faculties.

How to apply

Applying for postgraduate programs at Deakin is easy – you can even track the progress of your application online.

Postgraduate degrees by coursework

At Deakin, we recognise that people learn in different ways throughout their working life, and while in most instances it is an admission requirement to have a bachelors degree, there are also several courses where students can be admitted based on their relevant work experience. For example, applicants without a bachelors degree, but with relevant professional experience and appropriate prior learning, may be eligible for admission at a graduate certificate level in some courses and on successful completion be eligible to apply for admission to the graduate diploma or masters course.

To apply for a postgraduate degree by coursework, you will need to complete an online application at www.deakin.edu.au/apply.

Once you have applied, you can track the progress of your application and accept your offer online.

Applications for enrolment in Trimester 3, 2010 and Trimester 1, 2011 are open from August 2010. Applications for Trimester 2, 2011 will open from April 2011.

We encourage you to submit your application early because some courses have limited places or quotas.

Applications received after the quotas have been filled for Trimester 1 commencement will be considered for a place in Trimester 2.

Some postgraduate courses, such as the Master of Teaching, may have alternative application processes and closing dates. For the most up-to-date information, please visit our web site www.deakin.edu.au/postgrad or call our customer service team on 1300 DEGREE (1300 334 733) to request a postgraduate study area booklet.

Research degrees

To be eligible for admission to a PhD, you must have completed an honours degree with a minimum upper second class result, or an equivalent masters degree which includes a research thesis component or other qualification.

To be eligible for admission to a masters by research, you must have completed an honours degree with a minimum second class result or other equivalent qualification.

Research degrees (referred to within Deakin as higher degrees by research or HDR) can be commenced at any time of the year. As such, if you are interested in making a candidature application (but not a scholarship application) you can do so at any time.

If you meet the eligibility requirements for a research degree you should first visit the web site of the relevant Faculty to see the areas in which research is being conducted, see www.deakin.edu.au/faculties.

Before you apply, please discuss your research opportunities and the availability of supervision and supporting facilities – such as laboratory, computing or library facilities – with the relevant School, Faculty or potential supervisor. You should also discuss the nature of any preparatory or additional studies that might be required, as well as any special needs. It is advisable to make contact with a potential supervisor as early as possible in planning your research.

If you are interested in making a candidature application in addition to a scholarship application, you must do so before the relevant closing dates.

The closing dates for 2011 scholarship applications are as follows:

- » International applicants – 30 September 2010
- » Australian and New Zealand citizens and Australian permanent residents – 30 June 2010 and 31 October 2010.

English language requirements

If your first language is not English, Deakin University reserves the right to seek further documentary evidence of English proficiency. You may be required to provide such evidence, for details, please visit www.deakin.edu.au/future-students/international/apply-entry/english-req.php.

Please note, individual Faculties or Schools may have higher requirements. For more information, contact your relevant Faculty via the Faculty research contact details on pages 24 to 30.

Further information

Application forms and further information are available from www.deakin.edu.au/research/admin/hdradmin.

If you are interested in a research degree, please contact in the first instance:

Research Services Division

Phone: +61 3 9251 7124
research-hdr@deakin.edu.au
www.deakin.edu.au/future-students/research

Key terms

Combined courses

An approved combination of courses in complementary areas, undertaken simultaneously, which leads to the conferral of two awards e.g. MBA/Master of Professional Accounting. This means you will complete two degrees in a shorter timeframe than it would take to complete the degrees separately.

Credit for Prior Learning

Credit granted towards your Deakin course for relevant approved study, experience or work satisfactorily completed at the University or elsewhere. There are two aspects to Credit for Prior Learning:

- » credit may be transferred to your Deakin program from completed or partly completed studies you have undertaken at other accredited institutions; and
- » credit may be granted on the basis of knowledge and skills acquired through uncredentialed learning.

Credit point

A measure of workload. Most postgraduate units are equivalent to 1 credit point.

Electronic Commonwealth Assistance Notice (ECAN)

Electronic Commonwealth Assistance Notice, shows FEE-HELP and OS-HELP contributions and amounts reported to the Australian Taxation Office.

Equity and Diversity

The Equity and Diversity Unit provides a range of programs to ensure all students have the opportunity to access university education and succeed in education and employment.

Faculty

An organisational division within a university; for example, the Faculty of Arts and Education is one of the four Faculties at Deakin University. Within each Faculty are several Schools, for example the School of Law is within the Faculty of Business and Law.

FEE-Higher Education Loan Program (FEE-HELP)

A loan scheme for Fee-Paying Place (FPP) students, repayable through the Australian taxation system once your annual income exceeds the minimum threshold for repayment.

Fee-Paying Place (FPP)

A place that is not subsidised by the government, so you pay the full cost of the course. As an FPP student you may be eligible to defer repayments through the Australian taxation system, through FEE-HELP. Your employer may also contribute to the cost of study if the course is related to your current position.

Off-campus study

Off-campus courses, or courses offered by distance education, are the same as on-campus courses; the only difference is that rather than attend classes in person, you study away from Campus using a variety of other methods, including online technologies, study guides, reading lists and audiovisual materials.

Postgraduate degree

Courses of study beyond bachelor level, including graduate certificates, graduate diplomas and research degrees (also known as higher degrees by research (HDR)). Eligibility for entry to a postgraduate coursework program normally requires a completed undergraduate degree, however, professional and industry experience will also be considered. Eligibility for entry to a research degree normally requires an honours degree of an appropriate standard, or an equivalent qualification.

Single-subject (non-award) study

A non-award unit is a unit of study from a degree course taken outside a degree program. If successfully completed, the unit may be counted as credit towards a degree course at Deakin, subject to admission to a degree course and approval by the Faculty.

Trimester

The method of organising the teaching year. At Deakin University there are three trimesters: Trimester 1 runs from March to June, Trimester 2 from July to October, and Trimester 3 from November to February.

Unit

A university subject or unit is normally one or two trimesters long and may have a value ranging from 1 to 4 credit points.

For a comprehensive list of common terms, visit www.deakin.edu.au/glossary. You can also ask one of our course advisers to explain anything you don't understand about your course structure or requirements. Phone 1300 DEGREE (1300 334 733) and ask to speak with a student adviser.

Study options at Deakin

Flexible learning

Deakin offers you the flexibility and choice to make your learning experience fit with your lifestyle, work and personal commitments.

With four Campuses and off-campus study options, you choose where and when you study. By tailoring a course to match your career goal, you can specialise in one area or opt for a breadth of topics. There is no limit to your options.

You can choose from a variety of teaching delivery methods including traditional on-campus lectures, podcasts, iLectures, online tutorials and residential programs. Flexible course entry and exit points, and full-time and part-time study all allow you to choose the pace of your study.

Depending on the course chosen, Deakin's trimester system also means you may be able to begin your studies at a time more convenient to you.

On-campus study*

On-campus students usually receive a combination of lectures and tutorials.

Lectures vary in size from 20 to 600 students, while tutorial classes are generally smaller, more informal and allow for open discussion of issues raised in lectures. Assessment may take a variety of forms, including written work and tests undertaken in class, participation in class or laboratory sessions, and final examinations each trimester.

Fieldwork or practical experience can also form a large part of the content and assessment of some units.

Off-campus study*

Off-campus courses, or courses offered by distance education, are similar to on-campus courses; the only difference is that rather than attend classes in person, you study away from a Campus using a variety of other methods, including online technologies, study guides, reading lists and audiovisual materials. Most coursework and research programs are available in off-campus study mode.

For more information about off-campus study see page 17 or visit www.deakin.edu.au/future-students/mature-age/study-online.php.

Switch between on and off-campus study*

Another aspect of the flexibility available to Deakin's students is the option to switch between on and off-campus study during your course (provided the course is available in both study modes).

Contact hours

If you choose to study off campus through distance education, it is recommended that you spend approximately 10 hours of study per week per unit.

If you are enrolled as an on-campus student, most units require three contact hours per week, plus up to seven hours per week of individual study time.

Undertaking a research degree on a full-time basis requires a much greater commitment of time than a coursework degree: at least 36 hours per week for 48 weeks of the year, for a full-time student.

* Not all courses or units are available through on-campus study and off-campus study.

Online learning

All courses have an online component. Access to online education adds another dimension to your degree and prepares you for success in your career. Online learning aims to complement, not replace, traditional teaching. Delivering units online creates an opportunity for you to learn in a variety of ways and gives you more control over your learning.

You can access your online units 24/7, giving you the flexibility to study when and where it suits you. Online learning provides you with valuable experience in a world that is increasingly dependent on information technology.

Full-time or part-time mode

You can study full time or part time depending on the number of credit points you take in each trimester. Every unit (subject) you enrol in has a credit point rating and most postgraduate units are equivalent to 1 credit point. If you are enrolled in 3 or more credit points in a trimester, you are deemed to be full time for that trimester. A small number of courses are only available full time, and some are only available part time.

International study tours

Some courses offer you the opportunity to participate in study tours. Studying on a study tour gains you credit towards your degree but doesn't extend the length of your studies. It's not every day that you can have breakfast in China with a lecturer in international business, wander around the Taj Mahal discussing the Mughal empire with an expert in Indian commercial law or discuss potential investing opportunities with a business manager. Study tours integrate educational, cultural and practical experiences, placing your studies in an international context.

Trimesters

Deakin now offers a third trimester between November and February each year. This gives you the opportunity to fast-track your course, or commence your studies at a more convenient time of the year, subject to the availability of units.

Single-subject (non-award) study

You can pursue your personal or professional interests with a Deakin single-subject (non-award) unit.

Single-subject (non-award) study provides access to a wide variety of tertiary-level units. Most units offered by Deakin are available for non-award study. Some units have prerequisites or special requirements, but most are open to all. Enrolling in single-subject (non award) study allows you to test the waters before enrolling in a full program. If successfully completed, the unit may be counted as credit towards your chosen degree course at Deakin, subject to admission to a degree course and approval by the Faculty.

Practical programs

Some postgraduate programs allow you to take up a practical component during your studies. This gives you the opportunity to put theory into practice, make contacts and build networks that will serve you well beyond graduation. A practical learning experience teaches skills that can't be learned in the classroom and develops personal qualities that make Deakin graduates stand out from the crowd. For example, the Deakin Business School offers two units aimed at giving you real-world business experience while earning credit toward your degree. These are the Business Practicum and the Postgraduate Internship.

Campuses

Deakin University has four Campuses in the state of Victoria – one in Melbourne, two in Geelong and one in Warrnambool – as well as the option of studying off campus.

Each Deakin course adheres to the same high standards, regardless of where and how you study. So a Graduate Diploma of Psychological Studies at the Melbourne Campus at Burwood is the same as a Graduate Diploma of Psychological Studies at the Geelong Campus at Waurn Ponds, the Warrnambool Campus and off campus.

Each Campus has a distinctive character and a strong presence in the local community. For tourist information visit www.visitvictoria.com.au.

Deakin's Campuses are all conveniently located and easily accessible by public transport or car, with on-campus car parking. For public transport information for all Campuses, visit www.victrip.com.au. For information about travelling to Deakin in an environmentally friendly and sustainable way such as cycling and public transport, visit www.deakin.edu.au/travelsmart.

You'll find Deakin's Campuses are well signed and easy to navigate. Campus maps can be found at www.deakin.edu.au/campuses. If you would like to book a tour at one of Deakin's Campuses, please email enquire@deakin.edu.au.

Each Campus provides you with a variety of facilities to enhance your experience at Deakin University. These include:

- » libraries
- » food outlets
- » 24 hour computer laboratories
- » 24 hour on site security
- » medical centre and health services
- » multi-faith prayer rooms.

Melbourne

The city of Melbourne has a population of 3.9 million people. It is exciting and well-known for its music and cultural festivals, quality restaurants, entertainment venues, beautiful parks and gardens and excellent shopping. Its world-class sporting and recreational facilities attract international events such as the Australian Open Tennis, Melbourne Cup, and the International Cricket Test series.

The suburb of Burwood is a major commercial and residential municipality in Melbourne's east, approximately 15 km from the CBD. Burwood is a mix of quiet residential streets and bustling shopping centres, with important retail centres in the neighboring suburbs of Box Hill, Chadstone and Forest Hill. The local area has more than 350 parks and reserves.

Melbourne Campus at Burwood

This thriving Campus is Deakin's largest and attracts about 17 000 undergraduate and postgraduate on-campus students. It boasts open and inviting spaces for socialising and studying, innovative architecture, spacious new buildings and many wireless locations.

Features of the Melbourne Campus at Burwood include:

- » Deakin University Art Gallery
- » *Motion.Lab* – motion capture facility
- » a purpose-built gymnasium and sports hall
- » International English Language Testing System (IELTS) Test Centre
- » single-room accommodation for 200 students in a mixed gender and multicultural living and learning environment.

Geelong

Geelong is Victoria's second largest city, with a population close to 212 000 people. It is situated beside the beautiful Corio Bay and Barwon River, and is less than one hour from the centre of Melbourne by car or train.

It is known as the gateway to the world-famous Great Ocean Road and is close to some of the best surf beaches in the world. Geelong has all the modern amenities of a larger city, including excellent cafés, restaurants, shopping and recreational facilities, and offers a clean, healthy and relaxed environment in which to live. Geelong is one of Victoria's fastest growing regions. Traditionally an industrial city, Geelong now boasts strategic growth in industries such as tourism, education and knowledge, innovation and research.

The recently opened, 23 km Geelong Ring Road, on the city's western outskirts, reduces travel time around the city to 15 minutes – making travel to and from Deakin's Geelong Campus at Wauran Ponds even easier.

Travel between Deakin's Geelong Campuses is easy, with five bus routes, including an express service, now linking the Waterfront and Wauran Ponds Campuses.

Geelong Campus at Wauran Ponds

On the western edge of Geelong, this Campus is Deakin's second largest, with more than 4300 on-campus students. Services and facilities include:

- » fitness club and sports hall, tennis courts, walking/running track and sporting fields (cricket, football, soccer, gridiron, archery, golf driving range)
- » single room, on-campus accommodation for 447 students in a mixed gender, multicultural living and learning environment
- » Deakin Medical School.

The Campus is home to the Geelong Technology Precinct (GTP), which provides research and development capabilities and opportunities for university–industry partnerships and new enterprises in the region.

The Deakin Management Centre is also located at this Campus. The Centre is the setting for Deakin's residential programs, which give you the opportunity to complete a unit in five consecutive days of intensive study. The Deakin Management Centre provides an ideal learning environment in which participants complete challenging study tasks, punctuated by relaxation and leisure activities.

Geelong Waterfront Campus

The Geelong Waterfront Campus is Deakin's newest Campus, located beside Corio Bay, in the central business district of Geelong. Originally built in 1893, the buildings have been extensively renovated to create a modern and impressive Campus centre. More than 2100 students are based at the Waterfront Campus, which hosts the School of Architecture and Building, the School of Health and Social Development and the School of Nursing and Midwifery. Services and facilities include:

- » Computer Aided Design (CAD) laboratories
- » design studios
- » purpose built occupational therapy and nursing laboratories.

A \$37 million redevelopment of the Dennys Lascelles Building has increased the capacity of this Campus, allowing the University to provide an expanded range of courses. This building houses the Alfred Deakin Research Institute, the Alfred Deakin Prime Ministerial Library and an interdisciplinary teaching and research centre covering political science, public policy and governance, international relations, globalisation, journalism and communications.

Warrnambool

Located at the western end of the world-famous Great Ocean Road, Warrnambool is the fifth largest city in Victoria, with a population of more than 32 000. Whales and maritime history are major attractions at Warrnambool and it is the ideal base for visiting wildlife reserves, forests, farms, waterfalls and one of the most spectacular stretches of coastline in the world. Warrnambool offers a truly unique opportunity and experience.

Warrnambool is around three and a half hours drive from Melbourne. Tourism, retail, primary industries and health are the major industries in the region and provide opportunities for casual, part-time or full-time employment.

Warrnambool Campus

Deakin's Warrnambool Campus is set on the banks of the Hopkins River, close to local surf beaches. Because of its location in a small, regional city and its on-campus student population of more than 1000, the Warrnambool Campus is a friendly, close-knit community, with personal and informal relationships between students and staff. On-campus facilities include:

- » excellent teaching and learning spaces
- » fitness club, basketball, netball and tennis courts and a golf course
- » single-room, on-campus accommodation for 240 students in a mixed gender, multicultural living and learning environment.

Off campus

Deakin is well recognised for the service it provides to more than 9500 off-campus students. As an off-campus student you will study exactly the same courses as on-campus students, except that instead of attending on-campus classes, you receive comprehensive study materials and study some units online.

Study materials may include study guides, reading lists, CDs and DVDs as well as Deakin's 'Software Essentials', which provides you with access to software you may need or find useful for your study at Deakin.

Off-campus students are supported through our award-winning library services and interactive study methods, including:

- » online conferencing for peer support and group and individual communication between our staff members and students. Online conferencing is an increasingly important part of our teaching and learning environment.
- » tutorial and tele-tutorial groups can be formed between you and a University-appointed tutor, depending on local enrolments in the same units. As a group member, you have the opportunity to discuss any aspect of your unit with your tutor and to make contact with other students.
- » weekend classes are conducted in some courses to enable you to meet our academic staff members and your fellow students. Depending on the unit, the weekend school is usually held only once each trimester, over one or two days. It is usually not compulsory to attend.

Specialist off-campus career advisers and language and learning advisers can help you with course direction and the development of successful study skills and techniques.

Deakin provides an online orientation with everything you will need to get started as an off-campus student, including information about:

- » exams and assessment
- » Deakin Card
- » Deakin Studies Online (DSO)
- » course materials and textbooks
- » library
- » study skills
- » student services
- » Deakin University Student Association (DUSA).

An optional face-to-face study skills orientation program for off-campus students is conducted in February at Deakin Campuses. Details are available at www.deakin.edu.au/current-students/transition from January each year.

You will also have a direct link to all your enrolment and fee records through Student Connect, studentconnect.deakin.edu.au/connect/webconnect. Student Connect allows you to:

- » access course completion details
- » access eCAF (electronic Commonwealth Assistance Form) and eCAN (electronic Commonwealth Assistance Notice)
- » access exam timetables
- » access fees information and make payments
- » access results
- » find and print assignment coversheets
- » find credit for prior learning information
- » re-enrol
- » receive confirmation of enrolment
- » track your assignments
- » update your address details
- » vary your enrolment.

Deakin University's off-campus courses are accredited by the Accrediting Commission of the Distance Education and Training Council (DETC).

For more information about off-campus study please visit www.deakin.edu.au/future-students/mature-age/study-online.php.

Student services

Deakin University offers a complete range of services and programs – from career advice to IT support and health services.

Study support

Study support is available to you throughout your time at Deakin, providing advice and assistance in areas including language development, time management, reading and note-taking, avoiding plagiarism, critical thinking, writing essays and reports, class presentations and exam preparation.

For more information, visit www.deakin.edu.au/study-success.

Career development and employment

Our Careers and Employment service has been recognised nationally by graduate employers and other universities for its support to students, and its innovative careers programs. To enhance your future employment prospects, our Careers and Employment services offer career guidance, job search assistance and interview and resume skills training.

Deakin University can help with your career options upon completion of your postgraduate course. Individual consultations with a careers counsellor typically address:

- » job seeking strategies
- » developing interview skills
- » career planning.

You will have access to Jobshop – an online job vacancy listing service that lists part-time, casual and full-time employment opportunities. Please visit the careers service at www.deakin.edu.au/future-students/services-facilities or Jobshop at www.deakin.edu.au/studentlife/aheadstart.

Counselling and personal support

Professional and experienced counsellors provide free, confidential psychological counselling where personal concerns or stresses are affecting your studies.

The counselling team also provides a range of programs and strategies to help you achieve success at university.

For further information, visit www.deakin.edu.au/counselling.

Financial support

The University offers a range of financial assistance to students, including interest-free loans, grants and food vouchers.

For further information, visit www.deakin.edu.au/financial-assistance.

Religious services

Deakin offers spiritual counselling and faith support services, including online discussion forums to students regardless of their religious backgrounds. There are opportunities for worship and prayer in a multi-faith space at the Melbourne Campus at Burwood and prayer rooms are available at all Campuses.

For further information, please visit www.deakin.edu.au/studentlife/chaplains.

Medical centre

Deakin University offers medical and nursing health care and advice to students across all Campuses.

Services include:

- » GP consultations
- » vaccinations for general health, course requirements and travel
- » tests and screenings including blood pressure, pathology and medical checkups
- » referrals to specialist doctors, hospitals, physiotherapists and psychologists
- » diet and exercise advice
- » mental wellbeing (e.g. homesickness, depression, anxiety)
- » treatment and care when sick.

Medical Centre staff are caring professionals with experience in students' health needs. Campus nurse consultations are free and all services are strictly confidential.

Health information is available in various languages at each medical centre.

For further information, visit www.deakin.edu.au/current-students/services/health.

Libraries

Deakin University Library provides a range of high-quality services that are innovative, relevant and customised to your needs.

Each Campus has a library that is open throughout the year where you can study, borrow books, use Library computers, or connect your own laptop to the University wireless network. Campus libraries provide modern and attractive new-generation learning spaces that give you a great choice of study options. Look out for quiet areas for study and research, multimedia pods for practising your presentations and completing group work, and vibrant lounge areas for reading or meeting up with friends.

There are more than 1.6 million books, journals, newspapers, videos, CDs and DVDs across the Campus libraries. Many of the Library's resources are online, so you can access them on campus, at home or at work – any day, any time – via your computer or your mobile phone. The Library also offers 'go anywhere' access to Library resources. Simply, direct your mobile phone browser to <http://m.library.deakin.edu.au>, and take the Library with you.

Resources not held by the Library can be requested from libraries worldwide. Off-campus students located in Australia may have print material from any Campus library sent to their nominated address free of charge.

Information sessions and Library tours during Orientation will help you get started, and online tutorials and face-to-face workshops, offered throughout the year, can help you locate materials for assignments and classes. The Library's help services – available in person or via email, phone or instant messaging – can also assist you to make the most of our services, and save you valuable research time. Liaison librarians with subject expertise can provide one-on-one consultations to discuss the information sources and search tools on offer. Small group, research-training sessions are also offered in person and online via the Library web site.

For further information about Deakin University Library, including opening hours, contact information and the latest on new services and resources, visit www.deakin.edu.au/library.

IT at Deakin

All students can access 24-hour computer laboratories on each Campus, and email and internet access for study purposes.

The laboratories include Macintosh and IBM computers and provide a range of software and facilities, including Microsoft Office, internet access, library services, multimedia tools, statistic and specialist teaching software and laser printing.

When you commence your studies at Deakin you will receive a CD-ROM (Software Essentials) containing software, information and support programs and the necessary links to communicate electronically with University staff.

Bookshops

Campus bookshops provide academic and general books, stationery, calculators, computer accessories, and art and photographic materials. You can also buy online at www.dusabookshop.com.au and have purchases sent to you.

Childcare

There are childcare centres on Deakin's Campuses at Burwood, Waurin Ponds and Warrnambool. Places are limited and in high demand so enquiries should be made as early as possible.

More information about our childcare services can be found at www.deakin.edu.au/studentlife.

Food and drink

All Campuses offer a range of spaces in which you can relax and socialise. Food and drink outlets vary from Campus to Campus but can include cafes, food courts, restaurants and bars. International meals and halal food are available on all Campuses.

Student services

Deakin University Student Association (DUSA)

DUSA is independent from the University and dedicated to enriching your university experience. DUSA believes the university experience isn't just about going to class, it's being part of a student community. DUSA membership gives you discounts on trips, entertainment and short courses, as well as access to the following:

- » more than 80 clubs and societies
- » sport – including Uni Games, Southern Uni Games and Campus sport
- » trips, tours and entertainment throughout the year
- » student representation – DUSA is your student voice and represents your interests at Deakin and in the wider community
- » student advocacy (academic and non-academic issues with the University)
- » DUSA bookshop – textbooks, stationery and general books
- » DUSA member card.

Find out more about the benefits of DUSA membership in full at www.dusa.org.au.

Disability services

Students with a health condition or a disability (long term or temporary) that affects access or ability to study should contact the Disability Resource Centre soon after enrolment.

The staff will develop a plan with you that may include:

- » alternative assessment arrangements, such as extra writing time and/or rest breaks in exams
- » academic support workers, such as note-takers and sign interpreters
- » study materials in accessible formats
- » help with assistive technology and training
- » information about extended library services, scholarships, etc.

For further information, please visit www.deakin.edu.au/disability.

Accommodation

Deakin University aims to provide you with an excellent living and learning experience on campus. Choosing the best type of accommodation for your needs is important for your total university experience. There are two types of accommodation services provided at Deakin: on-campus student residences or an off-campus housing referral service.

For further information, please visit www.deakin.edu.au/future-students/services-facilities/accommodation.

An Elite Athlete Friendly University

Deakin is dedicated to supporting elite athletes in their quest to achieve academic success alongside the demands of training and competition. That's why Deakin is a member of the Elite Athlete Friendly University (EAFU) network.

This means that we understand elite athletes may need extra support and flexibility when juggling the demands of university study and a sporting career. As such, we have a range of measures in place to do just this. These include enabling student athletes to negotiate assessment deadlines, lecture and tutorial attendance, and study loads to integrate with sporting commitments.

Student athletes may also be able to take several leaves of absence in order to meet sporting commitments and extend the length of time normally allowed to complete a course. We also provide course advice, academic planning guidance, and support for cross-institutional studies, where possible.

As an expert in off-campus education, Deakin is also the perfect choice for athletes who may want to continue studying during training or competition travel.

For more information about Deakin's support for elite athlete students, please visit www.deakin.edu.au/future-students/why-deakin/eafu.

Our Alumni community

Deakin takes great pride in the achievements of its graduates throughout the world and aims to provide life long learning and networking opportunities for all its Alumni.

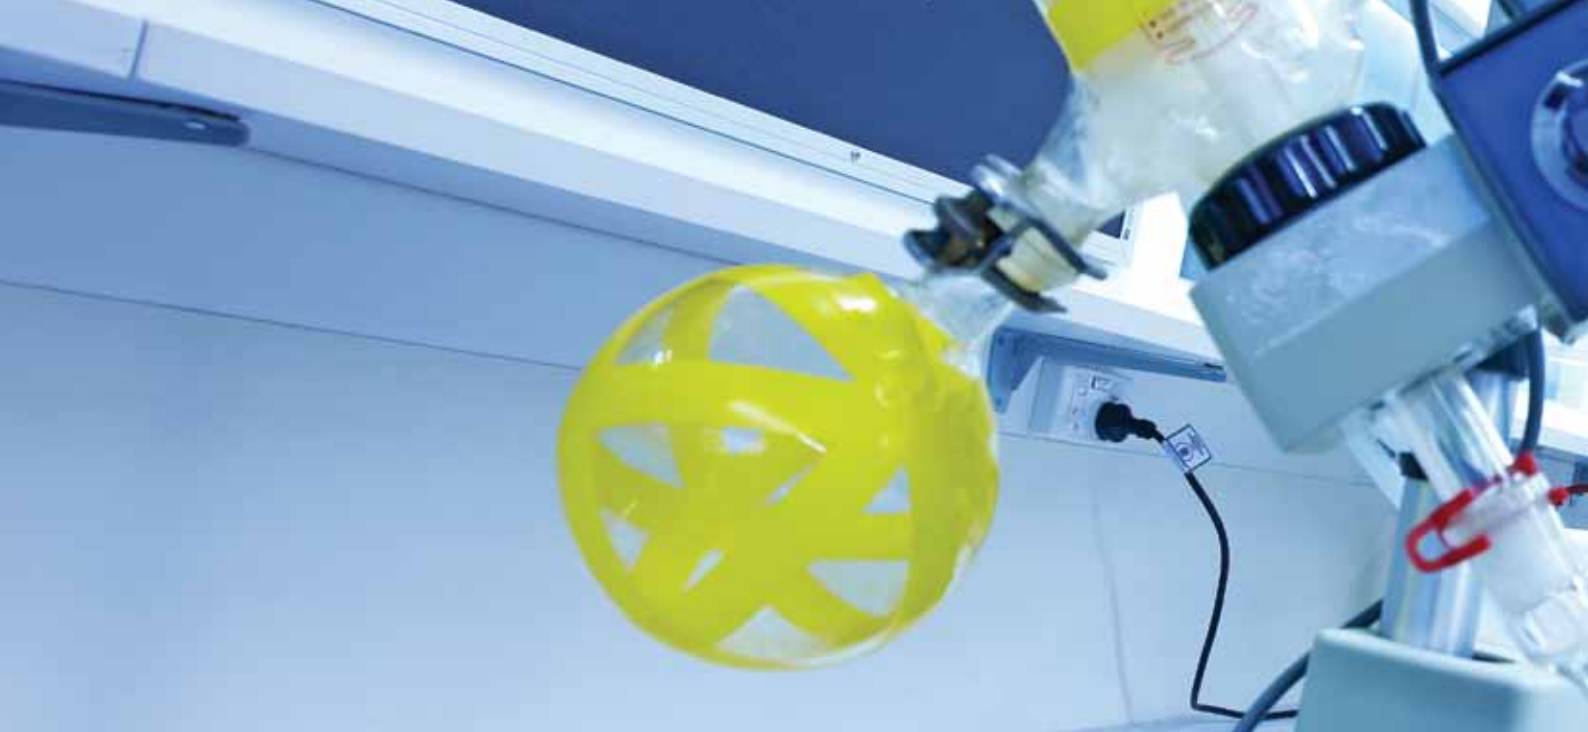

Once you complete your Deakin degree, you will be invited to become a member of our online Deakin Alumni community to continue your relationship with the University.

The Deakin Alumni community will enable you to keep or renew contact with your student and professional networks around the world and will help you grow your career after you leave the University.

Deakin Alumni members have access to many exclusive benefits including:

- » networking and professional development opportunities
- » career and employment advice for a lifetime
- » 12 months free Library membership (Australian residents only)
- » Alumni/student mentoring
- » online discussion forums
- » company discounts
- » social events
- » Alumni news services
- » discount gym memberships.

Alumni membership is free of charge and joining is easy. For more information visit the Deakin Alumni web site at www.deakin.edu.au/alumni.

Research that makes a difference

Universities are all about knowledge – creating, discovering, analysing, sharing and dispersing knowledge. Research is at the core of these activities and helps to make Deakin University a vibrant place to study.

At Deakin we take pride in being relevant to students and to their communities, not just in the courses we teach, but in the research we carry out.

Whether you want to study engineering, law, politics, education, psychology, medicine, health, nursing or another field, studying at a university that is committed to research that matters means you have the opportunity to learn from people who are making a real difference in the world.

More and more, Deakin University is becoming a research driven institution, which means that our lecturers include the people who write the textbooks, are highly regarded and at the cutting edge in their fields of research.

This is important, regardless of whether or not you want to pursue a research career, because it means that you will graduate with the latest knowledge in your chosen field.

We are very serious about providing excellent support and experiences for our research students, most of whom have opportunities to work with partner collaborators nationally and internationally, present at international conferences and use world-class facilities within Australia and abroad.

There has never been a more exciting or compelling time to be at Deakin University as it moves confidently towards the goal of improving the University's research performance so that it is in the top third of the Australian higher education sector.

This is being achieved by building a critical mass of researchers who will develop a distinctive, broad-based portfolio of high quality discovery, applied and commercial research.

A recent and important part of this progress is the establishment of the Institute for Technology Research and Innovation (ITRI). ITRI draws together world-class researchers from three existing areas of research strength – BioDeakin, the Centre for Material and Fibre Innovation, and Intelligent Systems and Robotics.

A 'Proof of Concept facility' at the Geelong Campus at Waurn Ponds will also play an important role in the University's research programs. This facility will give increased impetus to Deakin's commitment to building partnerships with industry, government and the community; this is a successful policy as growing collaborations in India, China, North America and Europe can attest. Deakin's approach to partnerships that provide real-world solutions was recognised at the annual Business/Higher Education Round Table Awards in 2008. The University also achieved excellent results in the Australian Research Council (ARC) 2010 awards, including 13 ARC Discovery and 10 Linkage awards.

In addition to the three research centres within ITRI, Deakin also has 11 strategic research centres:

- » Alfred Deakin Research Institute (ADRI)
- » Centre for Memory, Imagination and Invention (CMII)
- » Centre for Mental Health and Wellbeing Research (CMHWBR)
- » Centre for Physical Activity and Nutrition Research (C-PAN)
- » Centre for Research in Educational Futures and Innovation (CREFI)
- » Centre for Sustainable and Responsible Organisations (CSaRO)
- » Clinical Care, Quality and Risk Management (CCQRM) Group
- » Deakin Centre for Integrative Ecology (DCIE)
- » Molecular and Medical Research Group (MMRG)
- » Population Health
- » Centre for Biotechnology, Chemistry and Systems Biology.

Deakin's success in the Ford Global Challenge to design a Model T for the 21st Century is another highlight. Deakin was the only Australian university invited to participate in the challenge. The design and presentation was cutting edge, reflecting the quality of research being conducted at the University in advanced materials and lightweight metals for both the automotive and aerospace industries.

The University's Medical School plays an important role in enhancing Deakin's research reputation in public health. Another central component to Deakin's innovative work in health and wellbeing is the Clinical Research Facility. This is a multipurpose area capable of supporting both discipline specific and multidisciplinary activity.

The creation of the Alfred Deakin Research Institute highlights the University's international research strengths in history, politics and civil society.

To discover more about Deakin's research strengths, please visit www.deakin.edu.au/research.

Research degrees

Deakin University provides research degree programs to match a variety of career plans and personal circumstances. Part-time or full-time study is available on campus and some programs may also be available off-campus.

The two main types of research degree we provide are the research masters and the Doctor of Philosophy (PhD). A number of professional doctorate programs in Psychology (Doctor of Psychology) are also offered.

A masters degree is awarded to a candidate for making an original contribution to knowledge achieved in one to two years of full-time candidature or the part-time equivalent. The focus of these postgraduate degrees is on research, but some coursework may be included. The masters degree is an advanced qualification that is relevant for many careers, in areas such as education, nursing, law and engineering.

A doctoral degree is awarded to a candidate for making a substantial original contribution to knowledge achieved in two to four years of full-time candidature or the part-time equivalent. The PhD is recommended for those interested in pursuing a career in academia or research and is an ideal basis for many other careers.

To ensure you enrol in a research program that meets your needs and expectations, please discuss the available options with the relevant Faculty.

Faculty of Arts and Education

Course name course code	Years full time and Campus
Arts	
Master of Arts A800	2 B G W X
Doctor of Philosophy A900	3 - 4 B G W X
Education	
Master of Arts E850	1 - 2 B G X
Doctor of Philosophy E900	3 - 4 B G X

'I recently completed a doctoral thesis examining immigration detention in Australia at Deakin's Centre for Citizenship, Development and Human Rights. I began my PhD at Deakin in 2006 and have had the wonderful opportunity to work with experienced and dedicated supervisors. I have had access to many resources – including office space and administrative support – and Deakin has also offered career development opportunities, including sessional teaching and professional development programs.

'My research into immigration detention in Australia is interdisciplinary, drawing on social and political theory, law, and history ... I've also done sessional teaching, research assistant and administrative work throughout my candidature. Multi-tasking is important training for any job, and particularly academia, but the skills I develop as a tutor are completely different from those I develop as a researcher, and just as valuable.

'Deakin has a lot to offer and my advice to others is to get in touch with other Deakin postgrads, find out what resources are available, and attend all the info sessions and seminars you can. As well as giving you what you need, it's an important way of being part of university life at Deakin.'

Amy Nethery
 PhD candidate – Centre for Citizenship, Development and Human Rights, Faculty of Arts and Education

Research areas

Within the Faculty of Arts and Education, each School offers research opportunities in the following areas:

School of Communication and Creative Arts

Children's literature; communication studies; contemporary arts theory, collaborative arts and professional practice; corporate citizenship; communication studies; cultural studies and policy; dance; drama; digital culture and interactive media; journalism; linguistics and applied linguistics; literary studies; media and communication; media arts; post colonial literature studies; professional writing; public relations; visual arts; visual communication.

School of History, Heritage and Society

Anthropology; Australian studies; criminology and police studies; cultural heritage and museum studies; gender studies; history; museum studies; police studies; sociology.

School of International and Political Studies

Arabic language and culture studies; Asian studies; Chinese language; community development; Indonesian language and culture studies; international and community development studies; international relations and strategic studies; Middle East studies; philosophical studies; politics and policy studies; psychoanalytic studies; social studies of science.

School of Education

Action research and program evaluation; adult, vocational and workplace education; arts in education; curriculum theory and development; doctoral education policy and practice; early childhood education; educational administration; educational leadership and school renewal; educational politics and policy government and school system relations; equity and social justice; exceptional; flexible, online and distance education; humanities; information and communication technology; international schooling; language and literacy education studies; mathematics education; physical and health education; rural education; science and education for sustainability; teacher education and professional learning; teaching and learning processes; technology education; TESOL/TLOTE; wellbeing.

The amount of money paid to CEOs is a topic that's similar to football and the weather – plenty of people have an opinion but few can back it with solid research. A stand-out exception is Deakin University PhD student Graham O'Neill who will soon submit a thesis examining the issue of CEO pay.

Titled The Social Construction of CEO Pay: an Australian boardroom perspective, the work is the culmination of 25 years consulting experience paired with five years of study for Graham, who juggles his research with his position as a Principal with global consulting firm Mercer.

Initially a lecturer in psychology, Graham has been involved in the area of CEO pay and associated corporate governance for 15 years. He has held several senior corporate management roles yet considered his tertiary study unfinished. 'I always thought I would do it,' he says of his decision to research CEO pay. 'I have contributed publications over the years and I decided I wanted the opportunity to get out of the workforce for a couple of years and put the effort in.'

Graham has undertaken his PhD by research as an off-campus student and has high praise for Deakin's services. 'There is no question that Deakin's library facilities, in terms of access to materials for off-campus students and delivery of live resources, is fantastic ... it is a marked feature of Deakin that is amazing and extremely time-saving.'

Graham O'Neill
 PhD student – School of Management and Marketing
 Faculty of Business and Law

Doctor of Philosophy H930	3 – 4 B G X

Effectively managing the symptoms of cancer and its treatment is one of the most challenging – and important – roles a health specialist can undertake.

Deakin nursing graduate Emma Cohen, who is an oncology and haematology Clinical Nurse Specialist, is now undertaking a PhD program that explores the concept of patient participation in the effective management of complex, debilitating symptoms associated with cancer and its treatment.

'I graduated from Deakin in 2003 with a double degree (Bachelor of Applied Science and Bachelor of Nursing) ... I then undertook a Bachelor of Nursing honours degree concurrently with my graduate year in the oncology and haematology ward at the Alfred Hospital.

'I also pursued my interest in research by working as a research assistant until I commenced my PhD in 2006.'

She says there were two important factors that led her to choose Deakin for her PhD study.

'One was identifying a supervisor who produced high quality research and had the relevant expertise. I was fortunate enough to have worked with my supervisor when I undertook my honours degree ...,' she explains. 'Secondly, Deakin's School of Nursing and Midwifery has a number of research partnerships with major hospitals in Victoria.

These partnerships provide a link between the University and clinical environment which is very important and has also enabled me to have a PhD workspace within the hospital environment.'

Emma says the aim of her PhD project is to develop a model for the evaluation and enhancement of symptom management of patients with cancer who are admitted to hospital.

'This can be very challenging because symptom presentation is variable and patients frequently experience multiple symptoms simultaneously,' she explains.

She says her studies have provided the foundation knowledge she needs to practise, and the skills she needs to pursue research.

'There is a great network of supports available for postgraduate students at Deakin, particularly for higher degree by research students.'

Emma Cohen
PhD student
School of Nursing and Midwifery
Faculty of Health, Medicine, Nursing and Behavioural Sciences

Continued ➔

Research degrees

Faculty of Health, Medicine, Nursing and Behavioural Sciences research areas

The Faculty of Health, Medicine, Nursing and Behavioural Sciences offers research opportunities in the following areas:

Disability

Equity and access issues and the nature of disability in the areas of employment, telecommunications and assistive technologies; the law; community living; and evaluation of services.

Exercise and sport science

Physical activity and health; muscle and bone metabolism; movement analysis; musculoskeletal rehabilitation; and sport performance.

Food and nutrition science

Food formulation, chemistry and sensory evaluation with an emphasis on novel functional foods; molecular nutrition; substantiation of health benefits of functional foods; measurement and evaluation of food sources; nutritional assessment; exercise and behaviour; epidemiology and population health; public health policy; sports physiology and nutrition; diet and disease, including a specific interest in cancer, cardiovascular disease, lipidology, obesity, diabetes, osteoporosis and gut health.

Health

Health promotion; health economics; program evaluations; public health policy; community interventions; rural health; health and the environment encompassing sustainability, decision-making and community involvement; social determinants of health in which the focus is on equity, gender, ethnicity and inequality.

Medicine

Rural and regional general practice; health and wellbeing; chronic disease.

Nursing and midwifery

Symptom, safety and risk management in clinical and aged care in hospital, aged care and community settings. Other areas include acute and critical care; rural health nursing; health services evaluation; transitional care and midwifery.

Occupational therapy and sciences

Early childhood intervention; specific learning disabilities; developmental coordination disorders; social adaptive behaviour.

Psychology

Clinical, health and forensic psychology; social and mental health; adolescent health; risk behaviours, body image and disordered eating; drugs and alcohol; eye-witness testimony; treatment of offenders; human sexuality; healthy ageing and depression among older people; quality of life; relationships; human factors such as auditory and visual perception; and organisational psychology in health care settings.

The School of Psychology also provides the following specialist professional doctorate programs: Doctor of Psychology (Clinical), Doctor of Psychology (Forensic), Doctor of Psychology (Health).

Public health

Nutrition, physical activity and population health; public health and social/cultural aspects of health; health economics and program evaluation; international health; and health and human services systems.

Social work

Social work theory and practice; critical social work; evidence bases in social work; social work education; human services provision; child and family welfare; mental health; diversity and inclusivity; masculinities; religion and spirituality; gender relations and gender violence.

Research degrees

Spending six weeks marooned on an uninhabited island may not appeal to everyone, but for Julia Back's research it's ideal. Studying a Master of Science, Julia is investigating the effects of boat-based ecotourism on Australian fur seals in Bass Strait breeding colonies – research that takes her to remote locations.

'It's an easy topic to get people interested in, both because seals are such charismatic creatures and because of the public's growing awareness of conservation and sustainability issues,' she says.

Originally from Oregon (USA), Julia completed her Bachelor of Science (Biology). It was during her third year, while on a four-month stint in the Galapagos Islands, that she became fascinated with fur seals.

'I met these curious, intelligent animals, and I just couldn't learn enough about them.'

While doing independent research on seals in her final year, Julia became aware of the work of Deakin's Dr John Arnould.

'I knew I wanted to study seals, but it was the broader conservation scale of this project that really caught my interest,' she says.

She applied for a grant to work with Dr Arnould and was awarded a Fulbright scholarship which enabled her to come to Australia and pursue a masters degree.

At the seal colonies, Julia videos the seals' initial behaviour and how they react to the arrival of tourism boats. Once her research is completed, she will suggest management guidelines for tourism operators and present this to Parks Victoria. The aim is to develop protocols for ecotourism operators that take into consideration boat size, proximity to colony and other environmental factors such as wind direction and sea conditions.

'It's important that people get to see and learn about seals in their natural environment as it gets them interested in seals and seal conservation. At the same time it's essential that we protect this sensitive species.'

Julia's future study plans involve undertaking a PhD as well as continuing her work with seals and other species in need of conservation.

'This kind of work is extremely rewarding as I'm able to contribute something to the preservation of Australian fur seals and their environment.'

Julia Back
Currently studying: Master of Science
Faculty of Science and Technology
Fulbright Postgraduate Scholar

Faculty of Science and Technology research areas

Within the Faculty of Science and Technology, each School offers research opportunities in the following areas:

Architecture and building

Urban ecologies: Construction ecology; SocioCultural ecology; tectonic ecology.

Life and environmental sciences

Biomolecular sciences; chemistry and forensic sciences; ecophysiology, sensory ecology and behaviour; marine and freshwater science; palaeobiology and global change; wildlife and landscape ecology.

Engineering

3D (Dynamic Deakin Design); biological micro electro mechanical systems; networked sensing and control; signals and systems; sustainable industrial and urban water management.

Information technology

Bioinformatics; information security and forensics; network computing; optimisation, intelligent modelling and learning; pervasive and service computing.

Prue Hawkey was working part time at the Bendigo Art Gallery when she enrolled in Deakin's Graduate Diploma of Museum Studies. With a background in visual arts and arts she considered that the postgraduate program – with its broad range of subjects – would help advance her career.

In 2007, she began work with the City of Greater Bendigo as a temporary Heritage Project Officer.

'Initially this was assisting with research and preparation of heritage studies but I soon recognised that I could broaden my skills in built heritage to complement the work I was doing, so I decided to do a Master of Cultural Heritage. This qualification assisted me in obtaining my current permanent role as Heritage Officer,' she says.

Prue's role with the City of Bendigo is diverse. She project manages heritage studies by consultants, helps implement strategic heritage projects, prepares funding applications, reviews and monitors the effectiveness of heritage policies and provides advice to the Council's Heritage Advisory Committee.

She says the Master of Cultural Heritage program offered her a broad and relevant range of subjects.

'The topics were as varied as planning, intangible heritage, marketing, interpretation, and collections management. This solid background provides so many opportunities – I have drawn on nearly all the subjects I did at some point in my career. The course also helped me make contacts in the industry and gain hands-on experience.'

Experiencing both full-time on-campus and part-time off-campus study, Prue says both proved to be excellent options.

'Deakin's off-campus online facilities are fantastic – reading material for coursework and library books are delivered to your door. The virtual classroom or portal "chat room" is also very helpful. My studies at Deakin helped me enormously – I've got my foot in the door, and a solid background to further my career in the heritage sector.'

Prue Hawkey
Graduate Diploma of Museum Studies
Master of Cultural Heritage (2009)
Faculty of Arts and Education
Now: Heritage Officer, City of Greater Bendigo

Postgraduate degrees by coursework

A Master of Business in Sport Management from Deakin has helped Lisa Trainor kick several career goals. Working in the field of sports for over a decade, Lisa was initially operations manager at the North Melbourne Football Club before gaining a position at the Melbourne Cricket Club (MCC) where she soon became the MCC's corporate marketing manager. It was at that point that Lisa decided to study. 'I was looking for a challenge and I thought that doing some qualifications would help me get into a different role,' she says. Although Lisa did not hold an undergraduate degree she was admitted into Deakin's Graduate Certificate of Business (Sport Management) on the basis of her industry experience. On achieving excellent results in the Graduate Certificate, Lisa was immediately accepted into the Master of Business (Sport Management).

After four years as the MCC's corporate marketing manager, Lisa was appointed to her current general manager role. She loves being part of one of Australia's most recognised venues. 'I enjoy the diversity of what I do. The Melbourne Cricket Ground is a great iconic venue, and the MCC is a fantastic club to work for ... it is one of the largest and most prestigious clubs in the world.'

Lisa is responsible for the marketing and business related initiatives, including corporate sales, business development, and commercial arrangements with sponsors, suppliers, advertisers and merchandisers. She says her Deakin course helped her attain the position as well as preparing her for performing the role. 'It increased my knowledge base on a theoretical and practical level and gave me specific research techniques and teachings that are directly relevant to my role.'

Kate Pascale, who graduated from Deakin's Master of Public Health (MPH) program in 2009, has scarcely had a spare moment since establishing her own health consultancy business.

'When I first started the business I wondered how I would find work, but I needn't have worried as I've been non-stop from day one,' she says.

Her business, 'Kate Pascale and Associates', tackles a number of diverse projects across the public and private sectors including developing new models of practice and clinical guidelines, designing, implementing and evaluating health promotion programs and contributing to the development of public policy.

After many years working clinically as an occupational therapist across the acute, sub-acute and community health sectors, Kate was keen to seek new challenges.

'I felt confident that Deakin's practical and flexible MPH program would allow me to build on my professional skills and expand my career opportunities. As I continued to work full time throughout my studies, the flexibility and convenience of on-campus and off-campus study options also enabled me to balance my studies around work and family life,' she says.

Kate believes that the MPH program effectively brings together theory and practice to provide a comprehensive understanding of contemporary health issues, and it enabled her to network with students from diverse professional backgrounds and to understand different perspectives.

'The course is thoughtfully structured to ensure its relevance and it retains "real world" applicability within the context of current practice. This multifocal approach provides an opportunity to better understand our

health system, how and why health policy, systems and practices are developed and how we can work within those structures to achieve our objectives,' she says.

'Completing my masters has given me the ability to think more strategically about my work, speak the right language, demonstrate knowledge of the health system and then apply those skills to advocate for positive change.'

Kate Pascale
Master of Public Health (2009)
Faculty of Health, Medicine, Nursing and Behavioural Sciences
Now: Self-employed health consultant

Postgraduate degrees by coursework

When it came to choosing a university for her postgraduate studies, Rashmi Choudhary had a set of criteria which included course content, accreditation by the Australian Computer Society, and the university's ranking in the Australian marketplace.

'After doing a lot of research and comparisons on different universities for these criteria, Deakin became my obvious choice,' she says.

Rashmi completed a Master of Information Technology (MIT) in 2007 and is now working in Canberra as an IT Specialist with IBM Australia.

'I joined the company in April 2009 – and prior to that, I worked at Radiant Systems in Geelong as a software developer,' she says.

Rashmi completed a professional internship at the Geelong company during the last semester of her Deakin course.

'This was my first professional experience in the industry as an intern software developer ... it boosted my confidence a lot. After finishing the internship and consequently the MIT, I was immediately offered a full-time position in the company.'

From the time she started her Deakin studies in 2005, Rashmi enjoyed the University's facilities.

'There was 24/7 access to the computer lab, a vast collection of books and journals, student support groups, very approachable academics who were all experts in their fields and many other friendly Deakin staff.'

She says the MIT provided her with a solid foundation of knowledge and skills.

'It was not only the academic knowledge but also the style of learning ... the way we learned new skills and reinforced our learning through practise ... that helped me a lot in the professional environment.'

Rashmi says her current job offers considerable scope for career development and travel.

'Currently I am on a Department of Defence project in Canberra and commuting each week from Melbourne ... IBM Australia is a big company with clients located in different geographies so there will be opportunities to travel for business as well as learning.'

Important notes

Information correct at May 2010, Deakin University reserves the right to alter, amend or delete course offerings and other information listed.

- 1 Fees quoted are for Australian domestic students and should be used as a guide only. Fees are based on a typical enrolment in one year of full time study. All fees quoted are for Fee Paying Places, unless indicated CSP (Commonwealth Supported Place). Actual tuition fee charged may depend on the units studied and are subject to change. Master program students please note: where the length of the Master program is 12 units or 1.5 years of full time study equivalent, the indicative fee may not be a full fee for the course. For further fee information, including information about the FEE-HELP loan program and how you can defer your payments, see page 41 or www.deakin.edu.au/fees.
- 2 Most courses start in Trimester 1. This column indicates whether you have the option of commencing your studies in Trimester 2 or Trimester 3.
- 3 Only Indonesian can be studied off campus or at the Geelong Campus at Waurin Ponds.
- 4 Graduate entry preservice teaching qualification.
- 5 Off-campus course, however, attendance required on campus for a core unit intensive workshop.
- 6 Courses also offered through the Institute of Koorie Education, which uses community-based delivery.
- 7 The Bachelor of Medicine Bachelor of Surgery is taught across two semesters.

PT = part time

FT = full time

N/A = Not available at time of printing, please visit www.deakin.edu.au.

CSP = Commonwealth Supported Place

FPP = Fee Paying Place

T1 = Trimester 1

T2 = Trimester 2

T3 = Trimester 3

Fees and scholarships

Research degree fees

Australian citizens, Australian permanent residents and New Zealand citizens are not required to pay tuition fees for the normal duration of their research degree candidature, i.e. up to a maximum of four years of full-time equivalent study for a doctoral candidate and two years of full-time equivalent study for a masters candidate.

Postgraduate degrees by coursework fees

Tuition fees are assessed based on the unit(s) in which you are enrolled. This means you pay fees for the units you choose in your course, rather than paying a fixed course price. Different units have different costs, based on how much it costs the University to provide the particular unit.

The following table is a guide for domestic postgraduate tuition fees for each of the various disciplines. Fees are given per year, for an Equivalent Full Time Study Load (EFTSL). Note that a normal full-time study load of 8 credit points equates to one EFTSL (Equivalent Full Time Study Load).

Course and unit details and associated fees can be found by using the course search tool www.deakin.edu.au/future-students/courses.

Please confirm fees when you are applying by visiting www.deakin.edu.au/future-students/fees or phoning 1300 DEGREE (1300 334 733).

FEE-HELP loan program

FEE-HELP is a loan program that assists fee-paying students to defer the payment of their tuition fees. Australian citizens and holders of permanent humanitarian visas are eligible for FEE-HELP. Holders of other permanent visas are not eligible for FEE-HELP unless they are undertaking a bridging course for overseas trained professionals.

For more information please visit www.goingtouni.gov.au or phone the Department of Education, Employment and Workplace Relations (DEEWR) inquiry line on 1800 020 108.

Student income support

If you are undertaking a professionally oriented coursework masters degree that is required for entry to a profession or is the fastest pathway to professional entry (for example Master of Commerce, Master of Dietetics, Master of Professional Accounting or Master of Social Work), you may be eligible for student income support.

To be eligible for student income support through Youth Allowance and Austudy, you will need to be studying full time and to satisfy all other program requirements, including personal, parental or partner income tests. Please contact Centrelink on 13 2490 for further information about masters courses income support entitlements.

Funding cluster description	\$ per EFTSL*
Law	\$20 800
Accounting, Administration, Economics, Commerce	\$19 592
Public Relations	\$15 352
Humanities	\$12 896
Mathematics, Statistics	\$17 920
Computing	\$18 992
Built Environment	\$20 400
Other Health	\$17 584
Social Studies	\$15 144
Behavioural Sciences excluding Clinical Psychology	\$18 656
Education	\$14 336
Clinical Psychology	\$19 192
Foreign Languages, Visual and Performing Arts	\$17 264
Allied Health	\$20 112
Nursing	\$17 216
Engineering, Surveying	\$23 616
Science	\$23 616
Dentistry, Medicine, Veterinary Science	\$45 160
Agriculture	\$29 160

* Fees are per Equivalent Full Time Study Load (EFTSL), 8 credit points per year. That means, these are annual fees for a full-time student, (studying 8 credit points per year). So, if you are a part-time student, studying 4 credit points per year, your annual fees would be approximately half the figure quoted here. These costs are for 2010.

Fees and scholarships

Scholarship opportunities

Deakin offers a variety of scholarships to help support you financially during your studies.

General information about scholarships at Deakin is available at www.deakin.edu.au/scholarships. Further detail on scholarships for students enrolling in postgraduate research degrees at Deakin University is available at www.deakin.edu.au/research/admin/scholarships.

You can also visit the Commonwealth Department of Education, Science and Training Commonwealth Department of Education, Employment and Workplace Relations scholarships information web site for links to a range of scholarships relevant to postgraduate study, including Australian postgraduate awards www.deewr.gov.au. Many industry and community scholarships are also available.

International students

For information about fees and courses available to international students, please contact Deakin International for a copy of the *International Postgraduate Course Guide*, via email deakin-international@deakin.edu.au.

Course fees and tax benefits

When you enrol in a postgraduate course you may be entitled to an income tax deduction for your course fees and study-related expenses. You may be able to claim for your course fees, textbooks, stationery, student association fees, depreciation on equipment (for example your computer), or some of your travel expenses between home and the University or between work and the University. There is a threshold below which your expenses may not be claimable.

For the Australian Taxation Office (ATO) to allow self-education expenses to be tax deductible a direct connection must exist between your course and your existing work. If you are studying the course in order to maintain or improve a skill or specific knowledge that is required in your existing work, your course expenses might be tax deductible.

To clearly demonstrate to the ATO that a direct connection exists, you might have to provide a supporting statement from your employer.

Please note that this information is provided as a guide only. For more information about study and tax arrangements, please speak with your accountant or tax adviser or visit the ATO web site at www.ato.gov.au.

Cost-sharing with employers

Some employers provide financial and other support, such as study leave, for staff members who are completing study that is directly related to their employment and the employer's main business. At Deakin, many people are studying a postgraduate course with their employer's help.

Study support policies benefit both the employer and the employee.

For employers, when they support relevant study programs, they can help attract and retain well-qualified and experienced staff members. Before you approach your employer for study assistance, you should check to see whether a support policy is in place.

Try to give your employer every reason to agree to your application. It can help if you provide your employer with a written submission outlining the benefits and the direct and indirect costs involved. The submission could include information about:

- » the course you wish to study
- » any tax deductible aspects of the program
- » a summary of the short and long-term benefits that would flow to you and your employer
- » an estimate of the total course costs of fees, textbooks and other materials
- » an estimate of the time you would be required to be away from work in order to attend classes and exams, prepare reports and so on
- » what assistance you are requesting for aspects such as sharing of costs and granting of time off work.

Many employers are willing to share the course costs. They might either reimburse you after you have successfully completed the course or pay a percentage of the individual unit fees at the end of each trimester. If your employer is reluctant to support your study application, consider suggesting you form an agreement to cover contingencies. For example, propose that if you withdraw from or fail a subject or leave your job within a year of finishing the course, you will offer to pay back some of the fees your employer has paid.

Your employer might be concerned about how your studies will affect your availability and productivity at work. In the case of off-campus study it is easier to complete your studies outside working hours.

In many on-campus programs, classes are held outside regular working hours.

Further information

Where to get more information

Web site

Deakin on the web, www.deakin.edu.au, contains detailed information on everything at Deakin, including:

- » courses
- » unit descriptions
- » student profiles
- » Campuses
- » facilities and services
- » applications and scholarships
- » research.

To find detailed course information, including unit descriptions, you can go directly to the following sites:

- » Course search – search for Deakin's courses online www.deakin.edu.au/courses, find the course you are looking for then click on the unit code for a full description of that unit
- » Postgraduate Studies Handbook – the handbook provides a listing and description of all units and course structures www.deakin.edu.au/handbook.
